**1. NATURE OF OPERATIONS AND GOING CONCERN**

Newport Exploration Ltd. (the “Company”) was incorporated on September 19, 1979 under the Business Corporations Act, British Columbia and is considered to be in the exploration stage with respect to its evaluation and exploration assets. Based on the information available to date, the Company has not yet determined whether its exploration and evaluation assets contain ore reserves.

The Company’s head office, principal address and registered and records office is 408 – 837 West Hastings Street, Vancouver, British Columbia, Canada, V6C 3N6.

The recovery of the amounts comprising exploration and evaluation assets is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, and upon future profitable production.

These unaudited condensed interim financial statements have been prepared by management on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has incurred ongoing losses and has not earned operating revenue. A number of alternatives including, but not limited to selling an interest in one or more of its exploration and evaluation assets or completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining additional working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

The unaudited condensed interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

The Company estimates it has sufficient working capital to continue operations through fiscal 2013.

**2. SIGNIFICANT ACCOUNTING POLICIES AND BASIS OF PREPARATION**

These condensed interim financial statements were authorized for issue on March 26, 2013 by the directors of the Company.

***Statement of compliance and conversion to International Financial Reporting Standards***

These unaudited condensed interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with the International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the IFRS Interpretations Committee.

These unaudited condensed interim financial statements do not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Company for the year ended July 31, 2012.

**3. ACCOUNTING STANDARDS NOT YET EFFECTIVE**

*Amendments to IFRS 7 “Financial Instruments: Disclosures”*

This amendment increases the disclosure required regarding the transfer of financial assets, especially if there is a disproportionate amount of transfer transactions that take place around the end of a reporting period. This amendment is effective for annual periods beginning on or after July 1, 2011.

*New standard IFRS 9 “Financial Instruments”*

This new standard is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets.

The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2013.

**4. RECEIVABLES**

Trade and other receivables are comprised of the following:

**6. EXPLORATION AND EVALUATION ASSET**

During the year ended July 31, 2011 and amended in July 2012, the Company entered into an agreement with Reva Resources Corp. (“Reva”), whereby the Company can earn a 50% interest in Reva’s Chu Chua massive sulphide deposit (“Chu Chua”) located north of Kamloops, British Columbia. In order to earn the 50% interest, the Company, on or before December 31, 2013, will need to carry out, and fund the estimated \$1,070,000 costs of the recommended work program on Chu Chua. Additionally, there are two separate 1% net smelter returns to underlying parties. Two significant shareholders of Reva are directors of the Company. During the year ended July 31, 2011, the Company incurred \$37,642 in geological consulting expenditures. During the year ended July 31, 2012, the Company incurred \$70,811 in geological consulting expenditures and paid \$5,000 as a security deposit. Additionally during the year ended July 31, 2012, the Company received a mining exploration tax credit of \$11,292. During the six months ended January 31, 2013, the Company incurred \$4,180 of geological consulting expenditures.

Subsequent to January 31, 2012, Reva accepted the sum of \$250,000 from the Company, the receipt of which was acknowledged by Reva as a work program credit of \$500,000 towards the Company’s obligation on the Chu Chua. Reva has confirmed a \$500,000 credit would be applied to the Company’s 50% interest earn-in commitment.

**7. PETROLEUM ROYALTY**

Under the terms of an agreement over the sale of CVL Resources (Barbados) Ltd. (formerly a wholly-owned subsidiary of the Company) in 2002, the Company retained a 2.5% royalty for any hydrocarbons discovered on certain petroleum exploration permits in Australia. During the six months ended January 31, 2013, the Company earned \$259,421 (2012 - \$Nil) of petroleum royalty and as at January 31, 2013, the Company had \$188,428 (July 31, 2012 - \$25,247) included in receivables.

**13. SEGMENTED INFORMATION**

The Company operates in one business segment being the acquisition of exploration and evaluation assets. The Company's mineral property is held in Canada.

**14. FINANCIAL AND CAPITAL RISK MANAGEMENT**

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The carrying value of receivables and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

The following is an analysis of the Company's financial instruments measured using the fair value hierarchy as at January 31, 2013 and July 31, 2012:

	As at January 31, 2013		
	Level 1	Level 2	Level 3
Cash	\$ 2,556,675	\$ -	\$ -
Short-term investments	\$ 3,270,876	\$ -	\$ -

  

	As at July 31, 2012		
	Level 1	Level 2	Level 3
Cash	\$ 2,556,163	\$ -	\$ -
Short-term investments	\$ 3,445,275	\$ -	\$ -

**Financial risk factors**

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

*Credit risk*

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, short-term investments and receivables. Management believes that the credit risk concentration with respect to financial instruments included in receivables is remote because instruments are due primarily from government agencies and cash and short-term investments are held with reputable Canadian financial institutions.

*Liquidity risk*

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they come due. As at January 31, 2013, the Company had a cash balance of \$2,556,675 (July 31, 2012 - \$2,556,163) and short-term investments of \$3,270,876 (July 31, 2012 - \$3,445,275) to settle current liabilities of \$10,012 (July 31, 2012 - \$34,611). To maintain liquidity, the Company is continually investigating financing opportunities. As disclosed in Note 1, there can be no assurance these efforts will be successful in the future. All of the Company's financial liabilities are subject to normal trade terms.

**14. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd...)**

**Financial risk factors (cont'd...)**

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

a) Interest rate risk

The Company has cash balances. The Company's current policy is to invest excess cash in investment-grade short-term deposits certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The effect of a 1% change in interest rates is approximately \$58,000.

b) Foreign currency risk

The Company is not currently exposed to significant foreign currency risk as most transactions are denominated in Canadian dollars.

c) Price risk

The Company is exposed to price risk with respect to commodity prices. Changes in commodity prices will impact the economics of development of the Company's mineral properties. The Company closely monitors commodity prices to determine the appropriate course of action to be taken.

**Capital management**

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral properties, acquire additional mineral property interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.
