NOTES TO THE INTERIM FINANCIAL STATEMENTS
OCTOBER 31, 2005
(unaudited – prepared by management)

1. NATURE AND CONTINUANCE OF OPERATIONS

Newport Exploration Ltd. (the "Company") is a Canadian company incorporated under the Business Corporation Act of British Columbia. The Company is primarily engaged in the acquisition and exploration of resource properties. To date, the Company has not earned significant revenues and is considered to be in the exploration stage.

These financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. These financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate.

2. SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial information does not include all of the disclosure required by generally accepted accounting principles for annual financial statements. In the opinion of management the accompanying financial information reflects all adjustments, consisting primarily of normal and recurring adjustments considered necessary for fair presentation of the results for the interim period. Operating results for the three-month period ended October 31, 2005 are not necessarily indicative of the results that may be expected for the year ending July 31, 2006. These interim financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial information and follow the same accounting policies as the annual financial statements of the Company except as noted below. Accordingly, these financial statements should be read in conjunction with the 2005 annual financial statements and notes thereto.

3. MARKETABLE SECURITIES

Marketable securities are comprised of the following:

5. MINERAL PROPERTIES

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

7. STOCK OPTIONS AND WARRANTS

Stock options

The Company has a stock option plan under which it is authorized to grant options to executive officers and directors, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company. Under the plan, the exercise price of each option equals the market price, minimum price or a discounted price, of the Company's stock as calculated on the date of grant. The options can be granted for a maximum term of 5 years. The board of directors has the exclusive power over the granting of options and their vesting provisions.

At October 31, 2005, the Company had outstanding stock options, enabling the holders to acquire common shares as follows:

Number of Shares	Exercise Price	Expiry Date
1,450,000	\$ 0.16	February 21, 2007

Stock option transactions and the number of stock options outstanding are summarized as follows:

	Number of Options	Weighted Average Exercise Price

Management Discussion and Analysis
For the three-months ended October 31, 2005

The following discussion and analysis, prepared as of December 18, 2005, should be read together with the unaudited interim financial statements for the three month period ended October 31, 2005 and related notes attached thereto, which are prepared in accordance with Canadian generally accepted accounting principles. All amounts are stated in Canadian dollars unless otherwise indicated.

The reader should also refer to the annual audited financial statements for the year ended July 31, 2005 and 2004, and the Management Discussion and Analysis for those years.

Statements in this report that are not historical facts are forward-looking statements involving known and unknown risks and uncertainties, which could cause actual results to vary considerably from these statements. Readers are cautioned not to put undue reliance on forward-looking statements.

Additional information related to the Company is available for view on SEDAR at www.sedar.com.

Description of Business

Newport Exploration Ltd. is a mineral exploration company engaged in the acquisition and exploration of mineral properties in Western Australia. The Company's head office is in Vancouver, British Columbia. The Company has an exploration property for nickel in Western Australia where it holds an option to acquire an 80% interest in an exploration license and a 75% interest in an application exploration license. The Company is a reporting issuer in British Columbia, Alberta and Saskatchewan and trades on the TSX Venture Exchange under the symbol NWX.

Results of Operations

The Company recorded a loss for the three months ended October 31, 2005 of \$93,542 or (\$0.01) per common share compared to a loss of \$54,523 or (\$0.01) per common share for the three months ended October 31, 2004.

Exploration Expenditures

During the three months ended October 31, 2005, the Company incurred exploration expenditures of \$199,964 (2004 - \$107,329). These expenditures for both 2005 and 2004 were incurred on the Company's Mulga Tank project.

The Company continues work on the Mulga Tank Nickel Project ("Mulga Tank") located in Western Australia. Mulga Tank is a significant target for the large dunite hosted nickel sulphide deposit located approximately 250km northeast of Kalgoorlie in the Northeast Goldfields of Western Australia, an area that contains some of the world's largest nickel deposits.

The Mulga Tank tenements comprise an Exploration Licence (“EL”) covering 210 sq km and an Application for Exploration Licence (“AEL”) covering a further 153 sq km. The Company has an option over an 80% interest in the EL and an option over a 75% interest in the AEL and all first year commitments and obligations have been met.

On September 26, 2005 the Company reported assay results from two vertical diamond drill holes (MTD001 and MTD002) that tested two anomalous zones within a large buried dunite and airborne magnetic anomaly indicative of unexplored nickel targets. BHP previously (1980s) completed a program of shallow RC drilling to bedrock and one shallow diamond drill hole. The dunite body, covering an area of approximately 4.7km x 3.2km, had received little attention in the past due to lack of outcrop, being totally overlain by sand, and was recognized by Newport as being prospective for a large nickel sulphide target.

The Company is very encouraged by the significant nickel mineralization it encountered in these two drill holes. *“To get a 270m intersection of 0.2% nickel in our first hole at Mulga Tank is outstanding”*, said Ian Rozier, President of Newport. *“To follow it up with a second hole two thousand metres away almost as good speaks volumes for the geophysical-geological interpretation and planning that preceded the drilling program and target selection. The Mulga Tank property is looking very good and we have an excellent land position.”* he further added.

The Company regards the identification of massive sulphide targets a very positive development at Mulga Tank. Newport is well financed and able to meet all its work commitments at Mulga Tank through 2006.

General & Administrative

For the three months ended October 31, 2005, the Company incurred a total of \$101,263 (2004 - \$69,126) on general and administrative expenses. Consulting was \$41,745 (2004 - \$20,640) which reflects the majority of the difference between the two years. Management believes the 2005 expenses are reflective of what the Company’s ongoing expenditures will be.

Other Income and Expenses

The Company recorded interest income of \$6,685 (2004 - \$11,015) as a result of interest earned on its term deposits.

Liquidity and Capital Resources

The Company’s working capital position at October 31, 2005 was \$1,120,379 as compared to a working capital position of \$1,469,307 at July 31, 2005. The decrease in working capital is primarily a result of the \$259,964 spent on exploration and acquisition costs in connection with the Mulga Tank project.

The Company has financed its operations to date primarily through the issuance of common shares and exercise of stock options and share purchase warrants. The Company continues to seek capital through various means including the issuance of equity and/or debt.

The Company has not paid any dividends on its common shares. The Company has no present intention of paying dividends on its common shares, as it anticipates that all available funds will be invested to finance the growth of its business.

The financial statements have been prepared on a going concern basis which assumes that the Company will be able realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

Commitments and Contractual Obligations

The Company has work commitments on its Mulga Tank project pursuant to its underlying agreements. Newport has fulfilled its obligations in accordance with the commitment schedule. The work and acquisition commitments outlined below are contingent on successful exploration results being obtained.

	Expiry Date	Exploration Expenditures	Acquisition Costs	Share Issuances

Significant changes in key financial data from fiscal 2005 to 2004 can be attributed to the closing of the Company's 1.94 million dollars private placement 2004. Also in 2004 the Company wrote down certain costs associated to the option on the Cuba Copper project and Mexican Gold project. In the third quarter of 2005, the Company granted 1.45 million incentive stock options,

which resulted in a \$122,153 stock-based compensation expenses using the Black-Scholes Option pricing model. This was the primary reason for the increase during that quarter.

During the fourth quarter of fiscal 2005 and in the first quarter of fiscal 2006, consulting fees increased as a result of the work program undertaken on the Mulga Tank project. Travel costs were lower in 2005 due to less travel once the Company had acquired the Mulga Tank project. There was an increase in the Company's office lease during the year. Most other expenses remained consistent.

Also, since entering into the agreement to acquire the Mulga Tank property in 2004, the Company has incurred \$664,050 in exploration expenditures on the project. Risk, Uncertainties and Outlook

The business of mineral deposit exploration and extraction involves a high degree of risk. Few properties that are explored ultimately become producing mines. At present, none of the Company's properties has a known commercial ore deposit. Certain of the Company's mineral properties are also located in emerging nations and, consequently, may be subject to a higher level of risk compared to developed countries.

Operations, the status of mineral property rights and the recoverability of amounts shown for mineral properties in emerging nations can be affected by changing economic, regulatory and political situations.

Other risks facing the Company include competition, environmental and insurance risks, fluctuations in metal prices, fluctuations in exchange rates, share price volatility and uncertainty of additional financing.
