Supplemental disclosure with respect to cash flows (Note 11)

The accompanying notes are an integral part of these interim financial statements.

1. NATURE AND CONTINUANCE OF OPERATIONS

Newport Exploration Ltd. (the "Company") is a Canadian company incorporated under the Business Corporations Act of British Columbia. The Company is primarily engaged in the acquisition and exploration of mineral properties. To date, the Company has not earned significant revenues and is considered to be in the exploration stage.

These interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. These interim financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate.

The interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

Working capital	$ 2,670,202	$ 785,608
Deficit	(33,030,227)	(32,796,532)

2. BASIS OF PRESENTATION

The accompanying financial information does not include all of the disclosure required by generally accepted accounting principles for annual financial statements. In the opinion of management the accompanying financial information reflects all adjustments, consisting primarily of normal and recurring adjustments considered necessary for fair presentation of the results for the interim period. Operating results for the six-month period ended January 31, 2007 are not necessarily indicative of the results that may be expected for the year ended July 31, 2007. These interim financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial information and follow the same accounting policies as the annual financial statements of the Company except as noted below. Accordingly, these financial statements should be read in conjunction with the 2006 annual financial statements and notes thereto.

3. MARKETABLE SECURITIES

Marketable securities are comprised of shares in publicly traded companies:

	January 31, 2007	July 31, 2006
Market value	$ 8,066	$ 10,066

During the year ended July 31, 2006, marketable securities were written-down by $3,909.

5. MINERAL PROPERTIES

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

Mulga Tank Nickel Project, Australia

During the year ended July 31, 2004, the Company entered into an agreement to acquire an 80% interest in an exploration license and a 75% interest in an application exploration license, collectively known as the Mulga Tank Nickel Project ("Mulga Tank") located in Western Australia. As at January 31, 2007, the Company has paid $165,000 and issued 675,000 common shares with a value of $132,000. To acquire its interest, the Company is required to:

i) On or before June 1, 2007, pay $45,000, issue 225,000 common shares and incur additional expenditures of $500,000.

5. MINERAL PROPERTIES (cont'd…)

Mulga Tank Nickel Project, Australia (cont'd…)

ii) On or before September 1, 2007, pay $150,000, issue 600,000 common shares and incur additional expenditures of $750,000.

iii) On or before September 1, 2008, incur additional expenditures of $1,000,000.

Upon completion of a feasibility study, the Company will be required to pay $240,000 and issue 750,000 common shares. Upon commencement of commercial production, the Company will be required to issue an additional 1,000,000 common shares.

As at January 31, 2007, the Company had advanced $66,414 for future exploration work.

6. ASSET RETIREMENT OBLIGATION

The Company estimates its asset retirement obligation at the Mulga Tank property based on its understanding of its requirements to reclaim the currently disturbed areas. The operator of the property has posted a bond for $9,264 representing costs required to mitigate the proposed disturbance, which has been included in advances.

The Mulga Tank property and some additional disturbance are authorized for drill site access and drilling sites for further exploration activity. The existing disturbance consists of access roads and drill sites. At January 31, 2007, the total cost of reclamation for this disturbance was estimated to be approximately $17,368. The asset retirement obligation is considered to be present value.

The asset retirement obligation accrual required management to make significant estimates and assumptions. Actual results could differ from these estimates.

7. PETROLEUM SALES

Under the terms of an agreement over the sale of CVL Resources (Barbados) Ltd. (formerly a wholly owned subsidiary of the Company), the Company retained a 2.5% royalty for any hydrocarbons discovered on certain petroleum exploration permits in Australia. Oil and gas production commenced in November 2005. Included in receivables at January 31, 2007 is $46,680 for the Company's royalty.

MANAGEMENT DISCUSSION AND ANALYSIS

For the Six Months Ended January 31, 2007

This discussion and analysis of financial position and results of operations is prepared as at March 26, 2007 and should be read in conjunction with the unaudited financial statements for the six months ended January 31, 2007 and the related notes thereto. Those unaudited financial statements have been prepared in accordance with Canadian generally accepted accounting principles for interim financial statements and, as a result, do not contain all disclosure required under generally accepted accounting principles for annual financial statements. Accordingly, readers are referred to the July 31, 2006 annual audited financial statements of Newport Exploration Ltd. (the "Company" or "Newport") and the accompanying notes. These documents are available for viewing at www.sedar.com. All dollar amounts included therein and in the following management discussion and analysis ("MD&A") are in Canadian dollars except where noted.

This discussion contains forward-looking statements that involve risks and uncertainties. Such information, although considered to be reasonable by the Company's management at the time of preparation, may prove to be inaccurate and actual results may differ materially from those anticipated in the statements made.

Description of Business

Newport Exploration Ltd. is a mineral exploration company engaged in the acquisition and exploration of mineral properties in Western Australia. The Company's head office is in Vancouver, British Columbia. The Company has a uranium exploration property in Western Australia where it holds an option to acquire an 80% interest in an exploration licence and a 75% interest in an application exploration licence. The Company is a reporting issuer in British Columbia, Alberta and Saskatchewan and trades on the TSX Venture Exchange under the symbol NWX.

Overview

The Company completed a non-brokered private placement consisting of 20 million units at $0.11 per unit for gross proceeds to $2.2 million. Each unit consists of one common share and one share purchase warrant that entitles the holder to purchase one additional share for $0.15 per share for two years.

Results of Operations

During the three months ended January 31, 2007, the Company incurred a loss of $132,016 compared to a loss of $113,640 for the three month period ended January 31, 2006. The significant changes during the three months ended January 31, 2007 compared to the three month period ended January 31, 2006 are as follows:

Consulting fees increased to $48,774 during the three months ended January 31, 2007 from the $40,787 incurred during the three months ended January 31, 2006 due to an increase in consulting fees to a director to $12,000 per month from $10,000 per month during the current quarter.

During the three months ended January 31, 2007 the Company incurred professional fees of $53,130 as compared to the $15,734 incurred during the three month period ended January 31, 2006.

During the three months ended January 31, 2007 property investigation costs decreased to $Nil from $11,799 during the three month period ended January 31, 2006 as a result of the Company evaluating certain additional mineral property opportunities.

The Company earned $33,165 in a petroleum royalty during the three months ended January 31, 2007 compared to $13,274 earned during the three months ended January 31, 2006, this was a result of the Company's retained 2.5% royalty on certain exploration permits in Australia oil and gas production commenced in November 2005.

Interest income of $10,772 was earned during the three months ended January 31, 2007 on cash held in short-term investments. This compares to interest income of $6,743 earned during the three month period ended January 31, 2006.

The Company recorded a loss of $240,679 for the six months ended January 31, 2007 (2006-$207,182). The increase in the loss over the prior year's comparative period was primarily due to higher costs for professional fees and regulatory fees. The increase in professional fees was due to higher than anticipated year end audit fees compared to what was accrued at year end as well as legal costs associated with a stamp duty issue the Company had on the Mulga Tank project. The increase in regulatory fees during the six months ended January 31, 2007 was a result of costs of the $2.2 million dollar private placement financing.

Liquidity and Capital Resources

The Company's working capital position at January 31, 2007 was $2,663,218 as compared to a working capital position of $785,608 at July 31, 2006. The increase in working capital is primarily a result of the $2.2 million raised in the second quarter.

As at January 31, 2007, the Company had current assets of $2,771,400, total assets of $3,927,780 and total liabilities of $101,198. There is no long-term debt. There are no known trends in the Company's liquidity or capital resources.

The principal assets of the Company are its mineral exploration properties, amounting to $1,071,189 as at January 31, 2007.

During the three months ended January 31, 2007, the Company completed a private placement for gross proceeds of $2.2 million. These funds, combined with funds on hand, will provide the Company with sufficient funds to meet its operating expenses and 2007 budgeted exploration programs on the Company's project in Australia.

Additionally, during the three months ended January 31, 2007, the Company issued 120,000 common shares on the exercise of options for proceeds of $19,200. Subsequent to January 31, 2007, the Company issued an additional 1,300,000 common shares on the exercise of options for proceeds of $208,000.

The Company has financed its operations to date primarily through the issuance of common shares and exercise of stock options and share purchase warrants. The Company continues to seek capital through various means including the issuance of equity and/or debt.

The Company has not paid any dividends on its common shares. The Company has no present intention of paying dividends on its common shares, as it anticipates that all available funds will be invested to finance the growth of its business.

The financial statements have been prepared on a going concern basis which assumes that the Company will be able realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

Commitments and Contractual Obligations

The Company has work commitments on the Mulga Tank project pursuant to its underlying agreements. Newport has fulfilled its obligations in accordance with the amended commitment schedule. The work and acquisition commitments outlined below are contingent on successful exploration results being obtained.

Expiry Date	Exploration Expenditures	Acquisition Costs	Share Issuances

Disclosure Controls and Procedures

The Company’s system of disclosure controls and procedures includes our Disclosure Policy, our Code of Conduct and Business Ethics and the effectiveness of our Audit Committee. The Company has established procedures that allow the identification of matters warranting consideration of disclosure by the Audit Committee, as well as procedures for the verification of individual transactions and information that would be incorporated in annual and interim filings, including Financial Statements, Management's Discussion and Analysis, and other related documents.

As required by CSA Multilateral Instrument 52-109, Certification of Disclosure in an Issuer's Annual and Interim Filings, an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures was conducted as of October 31, 2006 under the supervision of management, including the President and the Chief Financial Officer. The evaluation included review of documentation, enquiries of Company staff and other procedures considered by Management to be appropriate under the circumstances.

As a result of their evaluation, the President and Chief Financial Officer are of the opinion that the design and operation of the system of disclosure controls was effective as at January 31, 2007.

The President and Chief Financial Officer are also required to file certifications of our annual filings under Multilateral Instrument 52-109. These certifications may be accessed at www.sedar.com.

Risk, Uncertainties and Outlook

The business of mineral deposit exploration and extraction involves a high degree of risk. Few properties that are explored ultimately become producing mines. At present, the Company's property has no known commercial ore deposit. Other risks facing the Company include competition for mineral properties, environmental and insurance risks, fluctuations in metal prices, fluctuations in exchange rates, share price volatility and uncertainty of additional financing.
