3. NEW ACCOUNTING STANDARDS, AMENDMENTS AND INTERPRETATIONS

New accounting standards adopted:

The following standards and amendments to existing standards have been adopted by the Company commencing August 1, 2014:

IAS 32 (Amendment) Offsetting Financial Assets and Financial Liabilities

The amendment to IAS 32, Financial Instruments: Presentation, requires that financial asset and financial liability should only be offset and the net amount reported when an entity has a legal enforceable right to set off the amounts and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The adoption of this amendment has no effect on the Company's financial statements.

Several other new standards and amendments apply for the first time in fiscal 2015, however, they are not applicable to the financial statements of the Company.

New accounting standards not yet effective:

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

The Company has not early adopted these standards and is currently assessing the impact these standards will have on its financial statements:

- i) IFRS 7 (Amendment): Standard amended to clarify requirements for mandatory effective dates and transition disclosures, effective for annual periods beginning on or after January 1, 2015; and
- ii) IFRS 9: New standard that replaced IAS 39 for classification and measurement of financial assets, effective for annual periods beginning on or after January 1, 2018.

15. FINANCIAL AND CAPITAL RISK MANAGEMENT

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

The carrying value of receivables and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

Financial risk factors

The Company is exposed in varying degrees to a variety of financial instrument related risks and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, short-term investments and receivables. Management believes that the credit risk concentration with respect to financial instruments included in receivables is remote because instruments are due primarily from government agencies and cash and equivalents and short-term investments are held with reputable Canadian financial institutions.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when they come due. As at April 30, 2015, the Company had a cash and equivalents balance of \$1,154,498 (July 31, 2014 - \$1,754,167) and short-term investments of \$11,846,579 (July 31, 2014 - \$16,001,512) to settle current liabilities of \$304,472 (July 31, 2014 - \$2,629,968). To maintain liquidity, the Company is continually investigating financing opportunities. As disclosed in Note 1, there can be no assurance these efforts will be successful in the future. All of the Company's financial liabilities are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

a) Interest rate risk

The Company has cash and equivalents balances. The Company's current policy is to invest excess cash in investment-grade short-term deposits certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The effect of a 1% change in interest rates on the Company's short-term investments is approximately \$118,000.

15. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd)

b) Foreign currency risk

The Company is exposed to foreign currency risk with respect to its petroleum royalty which is denominated in Australian dollars. The effect of a 1% change in exchange rates between the Australian dollar and Canadian dollar foreign exchange on the Company's royalty receivable is approximately \$11,000. The Company does not currently hedge exchange risk. The majority of expenditures are denominated in Canadian dollars.

c) Price risk

The Company is exposed to price risk with respect to commodity prices. Changes in commodity prices will impact the petroleum royalty received and the economics of development of the Company's mineral properties. The Company closely monitors commodity prices.

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral properties, acquire additional mineral property interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

The Company is currently not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.

17. CONTINGENCY

The Company was served with a Notice of Civil Claim (the “Claim”) brought under the B.C. Class Proceedings Act and filed in the British Columbia Supreme Court. The Claim has not been certified as a class proceeding.

The Claim alleges that the Company failed to generally disclose a material change in its affairs relating to a royalty held by the Company on certain oil and gas properties in Australia. The Company believes that the claim is without merit, and intends to vigorously defend the claim.
